

Are you interested in leading finance practices in this growing private-equity-backed firm? This company is rapidly growing and is currently in the process of rolling out SAP for finance and field services. They are in search of someone who understands finance practices in this context. You must have experience using SAP (ECC or S4 HANA) and have understanding of group reporting, especially in a public cloud environment rather than on prem. You also will likely have experience in construction, facilities services, or general services and understand practices around revenue recognition and deferring revenue. Additionally, you will also need experience with accounts payable, accounts receivable, and recurring services. This role will be a major part of this firm's implementation of SAP and the growth of this firm as they expand. If you are inquisitive, enjoy driving change, and have a customer-focused mindset, take the next step in your career and apply now for this Finance Manager opportunity! Benefits include: Paid time off plan and holidays. 401(k) matching. Short term and long-term disability. Medical, dental, and vision plans with options. Life insurance. Company laptop. Professional career development opportunities. Tuition reimbursement program. Please note that this role is not eligible for visa sponsorship at this time. Apply now! No up-to-date resume required.
