Position Summary The Cloud Infrastructure Engineer works to design, implement, and manage scalable and secure cloud infrastructure in Microsoft Azure.

Principal Responsibilities Design, implement, and manage scalable and secure cloud infrastructure on Microsoft Azure. Collaborate with development teams to ensure seamless integration of applications with cloud services. Monitor and optimize cloud performance, ensuring high availability and reliability. Implement and manage Azure security best practices, including identity and access management, encryption, and compliance. Automate cloud operations using tools such as Azure DevOps, ARM templates, and PowerShell. Troubleshoot and resolve cloud-related issues, providing support to internal teams and clients. Stay up to date with the latest Azure features, services, and industry trends. Collaborate with project managers in development of detailed project plans. Produce technical documentation including work instructions, and installation qualifications. Assistance with issues escalated from downstream support teams

Education / Experience Requirements Bachelor's Degree (B.A.) from four-year college or university;

or equivalent combination of education and experience is desired. Minimum of 3 years cloud engineering with focus on Microsoft Azure. Strong understanding of Azure services, including virtual machines, storage, networking, and databases. Experience with infrastructure as code (IaC) tools such as ARM templates, Terraform, or Ansible. Proficiency in scripting languages such as PowerShell, Python, or Bash. Knowledge of CI/CD pipelines and tools like Azure DevOps or Jenkins. Excellent problem-solving skills and the ability to work independently and as part of a team. Azure certifications (e.g., Azure Solutions Architect, Azure Administrator) are a plus. Proficient with productivity tools such as Excel, PowerPoint, Word, and Visio. Microsoft Azure, Microsoft Windows Server, Entra Active Directory, Network Fundamentals, Scripting and system automation (Powershell, Python, TerraForm, etc). Specialized Skills / Other Requirements
